

# Welcome to AIS Math 7!

## Ms. Scheetz

---

AIS Math provides ***extra support to help you succeed*** in your regular math class!

We will spend a lot of time working together as a class, but you will also have opportunities to work independently and in small groups. Lessons & assignments will often include problems that:

- are very similar to those in your regular math class to reinforce key concepts & build your confidence,
- preview upcoming units or practice prerequisite skills in order to give you a head start on new material,
- spiral review throughout the year to keep important topics fresh in our minds.

**This class is graded as a PASS/FAIL course based on your effort.**

[GOOD NEWS - no quizzes, tests, or homework!]

Participation is key – raising your hand to answer or ask questions, taking complete notes, actively following along with class lessons, contributing during group work, and enthusiastically attempting independent problems are all great ways to engage.

This is a place where you should not be afraid to ask questions, make mistakes, or try something new!

Your AIS Math folder & notebook will be stored in the classroom, but please remember to bring a pencil, a highlighter, and your scientific calculator with you every day.

As a reminder, all work should be your own. Take pride in everything you produce & create, even if you're struggling to do it correctly. Developing a strong, persistent work ethic is admirable, and will serve you well far beyond the classroom!

***We will be able to achieve the most success by working as a team!***

Feel free to reach out to me anytime with questions or for progress updates.
